HazCentre ES&H Software Solution

Manage Hazardous Materials and other Inventories Better
HazCentre® is a proprietary, user-friendly, full-featured **EHS** software program that assists companies in managing hazardous materials, chemical inventories, and other items. We can tailor the package to fit your company’s particular needs and systems.

What makes HazCentre® a winner?
HazCentre® facilitates compliance with regulations governing the storage, use, and disposal of hazardous substances. It can be used to generate a full suite of reports on your company’s chemical and substance inventory. HazCentre® can serve as an automated, centralized data center, and can be used to quantify and control daily hazardous substance processing activities. It can also be used for the inventory management of nonhazardous materials.

HazCentre® has numerous unique features that set standards for environmental software design:

Unparalleled ease of use – intuitive to user, no programming knowledge needed
Simplified data entry – permits data importation from other systems; allows creation of custom routines for transferring data
Total solution – cradle-to-grave substance management
State-applicable information – software automatically applies the regulations for the given U.S. state
Unlimited database – users can track and record an unlimited number of items
Full MSDS capability – allows entry of all Material Safety Data Sheet information
Site and centralized reporting – input at site level can be compiled at a central facility
LAN and WAN compatible – ideally configured for use as a stand-alone system or with local area and wide area networks

On-Demand Service and Support
TelStar backs HazCentre® with on-demand service and technical support. We supply regular system updates. We can extend services to specialized programming and on-site training. We also offer warranty and guarantee programming.
